

IN THE ABSTRACT:

Replace the Abstract with the following:

~~In a first aspect, the invention is related to a~~ A cutting tool for parting and grooving operations of the kind ~~including comprising~~ a coupling part (1), which is intended for mounting the cutting tool in a machine tool, and a tool head (2) detachably connected to the coupling part. The tool head ~~includes comprises~~ a basic holder part (8) and, joined to the basic holder part, a blade part (9), in front portion of which an insert pocket is formed, in which a cutting insert (11) is fastenable. The cutting tool also ~~includes comprises~~ means for supplying cooling agent to the cutting insert. ~~Characterizing for the invention is that said~~ The cooling agent supplying means ~~includes include~~ a tube member (24), which is mounted in a recess, which is transverse to the longitudinal direction of the blade part (9) and arranged in the tool head. ~~The (2), the tube member has~~ has having an inlet for connection to a cooling agent source and an outlet for leading the cooling agent in a direction towards the cutting insert (11). ~~In a second aspect, the invention is also related to an individual tool head as such.~~
